## Detailed Action

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, drawn to a Taylor reactor.

Group II, claim 19, drawn to a substance.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the Taylor reactor in Group I and the substance of Group II do not share the special technical features because Group I is directed to a reactor while Group II is directed to a substance. Further, applicants must recognize that the substance of claim 19 can be prepared by other apparatus as well, such as an injection molding machine, a film extruder, etc.

Art Unit: 1796

A telephone call was made to Anne Gerry Sabourin (Registration No. 33,772) on June 11, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
